1 October 2019

Dear Mrs Dunk/Nuffield Parish Council

Update on work at our Nuffield gas site, Brixton Hill

I wanted to update you on the upgrade work at our Brixton Hill site in Nuffield.

The work, being done by our contractor Kier Siemens, is progressing well and is on target to be completed by March 2020. It's routine work and part of our ongoing commitment to look after the land we own.

We'll complete the civils works soon. This has involved changes to the perimeter fence and access gates. We'll also maintain the gas valves on Monday 21 October. This activity is annual maintenance. It involves venting each of the four valves for approx. 20 seconds before we start any maintenance (approx. half an hour of work for each valve). The activity can be quite loud, so I wanted to make you aware of this. It's only for a short time with no other significant impact.

In the coming months we'll concentrate on technical and electrical aspects to upgrade the site's lighting and CCTV. We'll write to neighbours later in the year when we have dates for testing the lighting and camera systems as part of the project's commissioning phase.

None of our work will affect local gas or electricity supplies.

Our working hours are Monday-Thursday 0800 to 1630 and Friday 0800 to 1600. We don't expect to work weekends but, if this changes we'll agree this with the local authority and let neighbours know in advance.

Please contact our Community Relations team if you have any queries about our work. They're available daily 7am-7pm on 0800 073 1047 or you can email nationalgridteam@jbp.co.uk.

Yours sincerely

Joseph McNeilly
Project Engineer
